THE NORTH CENTRAL ASSOCIATION QUARTERLY is published by the North Central Association of Colleges and Secondary Schools on the first day of July, October, January, and April. It is the official organ of the Association, and contains the proceedings of the annual meeting of the Association, together with much additional material directly related to the work of the Association. The regular subscription price is \$4.00 a year. The July number is priced at \$1.75; the others, \$1.00 each. All members of the Association—institutional and individual—are entitled to receive the QUARTERLY as part of their annual fees. A special subscription price of \$3.00 per year is permitted to school libraries, college libraries, and public libraries and to individuals connected with North Central Association membership institutions.

The Report of the Secretary of the Association¹

TODAY WE ARE CLOSING the sixtieth year of this Association. This is a rather significant event in the life of this organization. This Anniversary Year has been marked by the culmination of several important projects which the Association has been carrying on and the initiation of some new ones. Instead of attempting to report on all the activities of the Association and the Commissions, it seems appropriate to discuss the more important activities of the Association which are coming to a conclusion at the present time.

In November, 1952, the Association was approached by the Armed Forces of the United States with a request that it provide an instrument for the guidance and help of boys and girls in high school who might be facing the problems of entering our Armed Forces. They had felt very definitely the need for such a publication.

Since then the committee has been working very hard on this particular project. There is now ready for printing a volume called, *Your Life Plans and the Armed Forces*. It is designed in part to provide guidance for young people who are in our secondary schools. In my judgment, it would apply equally well to young men who are in our colleges, especially the freshmen and sophomores, to inform them about the nature of the Armed Forces, their various branches or units, and particularly to give them information

about the opportunities for continuing their education while serving in the Armed Forces.

A great many civilians are not informed about these opportunities, and the committee has found that a considerable portion of the Armed Forces are not familiar with all of them. For the first time in the history of the Armed Forces, this volume contains all of the information that is available about such opportunities and the nature of the Armed Forces as well. Each one of them—the Army, the Navy, the Air Force, the Marine Corps, and the Coast Guard—is described.

This publication has been approved not only by the Armed Forces, an action which was very difficult to get for they checked almost every period and every sentence, but it also has been approved by the National Association of Secondary School Principals, by all of the other Regional Associations, by the National Guidance Association, the American Council on Education, and a number of other educational organizations.

The Armed Forces have invested a considerable sum of money in this project. The book will be published during the summer and will be available in the fall. Thirty thousand copies will be distributed free, one to each secondary school in the United States.

I would like to recommend, whether you are in secondary schools or not (some copies will go to colleges), that you pay some attention to this volume.

¹ Presented at the Annual Business Meeting of the Association in Chicago, March 25, 1955.

It is my belief and the belief of all of these bodies that have seen it and studied it and approved it, that it is an instrument that will be of very great value in helping boys and girls who are going to enter the Armed Forces to adjust to the kind of life into which they are going; also, and this is the important thing, to gain from that life the educational values which are there if they wish to accept them.

Our Association had previously entered into another activity. In 1946 we were asked by the Armed Forces to accredit schools in foreign lands maintained for the children of service people who would ultimately return to the United States for college work. After a great deal of discussion the North Central undertook the project. It has been given to us as far as the other Regional Associations are concerned.

At first it was thought that such accreditation would terminate after a brief period because the Armed Forces would be out of Europe in a few years. Actually, it now looks as though the Armed Forces are going to be in foreign lands for a considerable length of time.

This organization of Dependents' Schools, as they are called, has increased until there are now thirty-four member secondary schools. They are scattered practically over the entire world. Almost every European country except those behind the Iron Curtain has one or more. They are also found in Northern Africa, Turkey, Puerto Rico, Japan, and the Philippines. I am just mentioning some countries to indicate how wide this organization is.

Operating schools which are under the direction of the Armed Forces as educational institutions is not the easiest thing. Any of you who have

been in service know how the military operate. They attempted to operate these schools in exactly the same way—with directions, with orders, with transfers of people regardless of the interests of the youth in the schools. As a consequence the Association has sent certain official representatives to Europe, to Asia, and elsewhere to investigate and report their observations. Such reports have been made once or twice in the past, the latest a year ago after Mr. Edgar G. Johnston and Mr. Lowell B. Fisher visited the schools in Europe, and Mr. J. Standifer Keas and Mr. John Rufi, the schools in Asia and the territories.

As a result of these activities, the Armed Forces have accepted a civilian educator, with high rank in the Army, to administer these schools in Europe, especially those in Germany. Mr. Earl R. Sifert has been our European representative since last summer. He will be there for another year or so in direct charge, in somewhat the capacity of a superintendent or a principal. There is also quite a large number of elementary schools. Of course these are not accredited, but we do operate them, and Mr. Sifert is in charge of them also.

This change in management has been very effective in improving these schools, in developing them as an educational organization, and in assuring that the youth in them will come back to the United States properly prepared either for civilian life or, in a large proportion of the cases, for admission to college.

One other thing that I would like to speak about is the problem of athletics. You are well aware of its history. You know that in 1952 we adopted standards for intercollegiate athletics. Many statements have been made that, because of objections, those standards have been abandoned, not used, and

so on. They are still on the books and are still being enforced.

However, there are difficult problems in trying to develop criteria for the direction of intercollegiate athletics. For example, the boundaries of the territory of the North Central Association are not identical with those of various athletic conferences. Hence some North Central colleges play in conferences which cross the boundaries of our territory, and, therefore, face rivals not governed by the same criteria for intercollegiate athletics. This creates a difficult problem and illustrates many of the issues which must be resolved.

In an endeavor to solve these problems two actions have been taken. One was to call a conference of representatives of all the Regional Associations at the Palmer House to consider how the Regional Associations might cooperate in solving these problems and arrive at certain basic agreements upon which criteria would be established. Only one association declined the call. The conference was not intended to develop a uniform set of criteria. The differences in the areas of our country are such that the application of uniform athletic criteria is not feasible.

However, the North Central Association believed that such a conference would be worth while and the conference was held. There was a great deal of agreement on many matters but there was also disagreement. This operation was started this year. It is not concluded. Arriving at agreement on all issues will take some time because such an action will not eventuate overnight. Personally, I am optimistic about the outcome. Judging from the comments of the representatives of the other Associations at the conference, one may hope that all of the Regional Associations will find it

possible to agree upon some basic principles for athletic criteria in the various Associations.

The problems and the criticisms that arose after the North Central Association had adopted the present criteria resulted in the appointment of a new committee which has spent approximately two years in a re-study of this problem. This was the other action referred to above. The committee has made a report to the Commission on Colleges and Universities which will come before this body for adoption later this morning. Many of you have seen this report. It is indicative of accomplishment, because it has gone to the individual schools and athletic conferences for consideration. There is general agreement concerning it.

One other matter should be mentioned. For a considerable length of time the Executive Committee of the North Central Association has been concerned about how we could best provide publicity for our activities, not just general publicity but a type that would reach the faculties of our member schools and colleges and the public in local communities; in short, that would be read by almost everybody.

Two projects have been tried which have been more or less successful. Previously the best one was "Know Your North Central," initiated while Mr. P. Milo Bail was president of the Association, and published for about two years. At present, because "Know Your North Central" didn't seem to work as perfectly as desired, the Executive Committee is issuing another bulletin, "The North Central Association Today," copies of which are in the foyer. They are free. Take them home with you. If you want them for your faculty we will be glad to send them to you at no charge. It is an experimental project to see if there is some way by which wider

knowledge may be disseminated about the activities of the Association, expressed in language which is not pedagogical and therefore has a more common appeal.

One other activity has been going on for the last two or three years. It is the change that is being made in the Commission on Colleges and Universities. Those who are members or who are otherwise connected with that Commission are well informed about it. As much cannot be said about the persons who do not have such an identification and so it seems worth while to give a little attention to it here.

The Commission on Colleges and Universities has been attempting to find a way whereby it could decentralize its activities to the end that the real function of our Association, as stated in the Constitution, could be discharged more effectively, namely, to aid schools in self-improvement.

One other factor stimulated this movement. It grew out of the National Commission on Accrediting, which two or three years ago proposed that all accrediting be placed in the hands of the regional Associations. The North Central has been struggling with that problem, because it is not at all easy to bring the great accrediting agencies which operate in professional and technical schools and other areas into cooperation with our Association. Therefore, the problem is to find ways in which effective cooperation can be brought about.

To study the work of the Commission certain committees have been appointed. One of them is the Committee on Planning, which is attempting to find the best methods to do things. Another is the Committee on Professional Accreditation which is dealing with means by which the institutions within our Association might work together for self-improvement.

The third is the Committee on Reorganization of Accrediting Procedures which is dealing more specifically with the problem of professional accrediting.

These committees, working together, have finally brought in a proposal for a considerable reorganization of the Commission on Colleges and Universities. Those proposals will be reported later in this Business Meeting, but I wanted to emphasize them here because it seems to me that they represent a very great accomplishment.

This reorganization provides for decentralization, for greater democratization (if I may use that term) in conducting the affairs of the Commission. In some respects the organization will be similar to that of the Commission on Secondary Schools which has been operating in a highly decentralized way for many years. The new organization brings greater authority and responsibility to the colleges in the various areas of the Association. One of its greatest values is that it holds great promise for acquainting college faculties with the Association.

For many years the Commission on Research and Service has been working for the improvement of teacher education in liberal arts colleges, teachers' colleges, and multipurpose institutions as well as for the in-service education of teachers. The development of experimental units is another well-known activity of this Commission.

One of the most significant present movements in the Commission on Research and Service is the continuation of the study of the articulation of secondary and higher education which was undertaken some years ago but which has been somewhat suspended for a short time. To the foregoing should be added the attention which the Commission has been giving

to social experiences in our secondary schools, which indeed is one of our most difficult problems.

A final project is the School-Library Study. One of the most perplexing problems of secondary schools is to obtain properly educated librarians. The Committee on the School-Library Study has been engaged in the study of the education of high school librarians which involves the question of standards. This Committee whose report was printed in the January, 1955, issue of *THE QUARTERLY*, was created through the cooperative action

of the Commission on Secondary Schools and the Commission on Research and Service.

The time allotted for this report has almost ended. As I said at the beginning, the purpose has been to select the most significant activities of the Association, some of which have been culminating this year. Mention of each one has been necessarily brief, but they indicate that the North Central Association has continued to go forward by executing projects of worth not only to education within its territory but throughout our country.

Proceedings of the Commission on Colleges and Universities

ANNUAL MEETING, MARCH 21-25, 1955

I. REPORT OF THE COMMISSION

THE COMMISSION ON COLLEGES AND UNIVERSITIES met in executive session on Tuesday afternoon, March 22, to take action on the recommendations of the Board of Review relative to applications for accreditation. The following actions were taken:¹

The Commission recommended that the following Bachelor's degree-granting institutions be accredited:

Marycrest College, Davenport, Iowa
Maryknoll Seminary, Glen Ellyn, Illinois
Our Lady of Cincinnati College, Cincinnati, Ohio

The Commission voted to recommend for accreditation the following junior college:

Burlington College, Burlington, Iowa

The following institution, accredited as a junior college, was recommended for accreditation as a four-year college conferring the Bachelor's degree:

Southern State College, Magnolia, Arkansas

The Commission recommended that the following institutions, accredited as Bachelor's degree-granting colleges, be accredited as institutions conferring the Master's degree:

Drury College, Springfield, Missouri
Mankato State Teachers College, Mankato, Minnesota
Northern State Teachers College, Aberdeen, South Dakota
Roosevelt University, Chicago, Illinois
St. Cloud State Teachers College, St. Cloud, Minnesota

¹ These recommendations were subsequently adopted by the Association at its meeting on March 25.

Western Michigan College of Education, Kalamazoo, Michigan

The Commission recommended that the following institution, accredited as a Master's degree-granting college, be accredited as an institution conferring the Doctor's degree:

Arizona State College at Tempe, Tempe, Arizona

The Commission noted that the following two institutions have discontinued operations as independent institutions and have withdrawn as North Central Association members:

Chicago Musical College, Chicago, Illinois
(merged with Roosevelt University on September 1, 1954)

Stowe Teachers College, St. Louis, Missouri
(integrated with Harris Teachers College on September 6, 1954)

The Commission took action modifying the policy under which an institution extending its program to the graduate level must submit to an examination within the year following the granting of the first graduate degree. Experience indicates that under this requirement institutions are compelled to submit themselves for examination before there has been sufficient opportunity for the newly introduced program of graduate study to mature. The modified policy adopted by the Commission charges the Board of Review with the responsibility for determining, on the basis of its knowledge of the situation in an institution, the time when the institution should present its program for evaluation.

The modified policy adopted by the Commission also permits the Board of Review to make approval of graduate programs retroactive to the extent to which, in the judgment of the Board of Review, such action would be justified. This action is designed to protect those students who earned degrees immediately before the program received the approval of the Association.

The Commission met in open business meeting on Wednesday morning, March 23, to hear reports from the Committee on Planning, the Committee on Professional Education, the Committee on Reorganization, and the Committee on Athletics. The reports of the Committee on Planning and the Committee on Professional Education were progress reports and no action on the part of the Commission was required. The Commission approved the recommendations of the Committee on Reorganization. It recommended for adoption by the Association the following amendments to the Constitution of the Association.

1. That paragraphs 1 and 2, Section 4, Article IV of the Constitution be replaced by the following two paragraphs:

The member colleges and universities of the Association shall be grouped according to geographic districts, the number and boundaries of the districts to be determined by the Commission. Also, the member colleges and universities shall be grouped by type of institution, the basis for the grouping to be determined by the Commission.

The Commission on Colleges and Universities shall consist of representatives of member colleges and universities elected by the Commission subject to the approval of the Association, and three representatives designated by the Commission on Secondary Schools. Election of members of the Commission shall be in accordance with a formula adopted by the Commission which shall provide for representation by district and by type of institution. Election shall be for a period of four years, one-fourth of the members to be elected annually. Members shall not be eligible for reelection until one year has elapsed, except in the case of a member of the Board

of Review who shall continue on the Commission as an added member until the expiration of his term on the Board.

2. That paragraph 4, Section 4, Article IV of the Constitution be replaced by the following paragraph:

There shall be a Board of Review whose membership shall consist of the chairman of the Commission, *ex officio* chairman of the Board of Review; vice-chairman of the Commission, *ex officio* vice-chairman; and seven members of the Commission to be elected by the Commission for overlapping terms of five years each. Upon the expiration of this term no member may succeed himself. If a person who is not a member of the Commission is elected to the Board of Review he shall automatically become a member of the Commission upon election to the Board. A person so elected to the Board of Review shall serve as an added member of the Commission in the event that the quota of Commissioners for that type of institution in the district concerned is already filled.

3. That paragraph 5, Section 4, Article IV of the Constitution remain as it is at present except for the addition of the following phrase at the end of this paragraph:

and, most importantly, shall assist colleges and universities in the territory served by the Association in their efforts to strengthen their educational programs.

These amendments were adopted by the Association at the business meeting on Friday, March 25.

On recommendation of the Committee on Reorganization the Commission also adopted a set of bylaws which provides in detail for the organization of the Commission under the new plan. These bylaws appear below.

The Commission on Colleges and Universities adopted the recommendations of the Committee on Athletics. The completed report was published on pages 315-19 of the April, 1955 issue of THE QUARTERLY. Under this action the policies and procedures developed by the Committee replaced the policy on athletics adopted by the Commission and the Association in 1952. The new policies and procedures were subsequently approved by the Association at the business meeting

on March 25. The recommendations of the Committee on Athletics provide for the creation of a standing Committee on Athletics to interpret and administer the new policy. This committee is to be appointed by the chairman of the Commission. The Commission requested a report to be made at the Annual Meeting of 1956 on the administrative structure, activities, and relationships with other agencies of the new committee on Athletics.

BYLAWS OF THE COMMISSION ON
COLLEGES AND UNIVERSITIES
NORTH CENTRAL ASSOCIATION

1. The member colleges and universities of the Association shall be grouped according to the following geographic districts:

District A—Michigan, Ohio, West Virginia

District B—Wisconsin, Illinois, Indiana

District C—North Dakota, South Dakota,
Nebraska, Minnesota, Iowa

District D—Kansas, Oklahoma, Missouri,
Arkansas

District E—Wyoming, Colorado, New Mexico,
Arizona

2. The member colleges and universities of the Association shall be classified by type. The basis for this classification shall be the highest degree offered by an institution. For purposes of inter-institutional communication and discussion of common problems the Commission shall consider petitions for reclassification from institutions which feel that they have a stronger community of interests with some group other than the group in which they would be classified on the basis of highest degree offered. So far as the accredited status of an institution is concerned this opportunity for re-classification would not exist; that is, an institution offering the Master's degree must be accredited as an institution offering the Master's degree and will be judged on the basis

of the norms applicable to that type of institution.

Comment.—It is recognized that this basis for classification does not provide for as large a measure of homogeneity within the groups as might be desirable. There were, however, equally serious if not more serious objections to other proposed classifications. Classification by highest degree offered is an important step in the direction of recognizing the several communities of interest which exist within the Association. Perhaps with experience a more meaningful basis for classification can be devised.

3. The members of the Commission on Colleges and Universities shall be selected by district and by type of institution. The Doctor's degree-granting institutions in each of the five districts shall be entitled to two Commissioners for each ten institutions or major fraction thereof but with a minimum of one and a maximum of four Commissioners. The Master's degree-granting institutions, the Bachelor's degree-granting institutions, and the junior colleges in each of the five districts shall be entitled to one Commissioner for each ten institutions or major fraction thereof but with a minimum of one and a maximum of four Commissioners in any one district. The Commissioners shall serve for four-year terms, one-fourth of the terms expiring each year, and shall be ineligible for reelection until one year has elapsed. At any one time there shall be no more than one Commissioner from any one institution.

The Commissioners in each district shall nominate persons annually to replace those whose terms have expired in accordance with the formula covering the distribution of Commissioners by type of institution within the district. The nominations from the districts shall be submitted to the

Nominating Committee for the Commission appointed annually by the Board of Review. The Nominating Committee for the Commission shall present its nominations to the Commission at the time of the Annual Meeting of the Association. Election of the Commissioners shall be by the representatives of the member institutions at the Annual Meeting on recommendation of the Commission.

4. The Commission on Secondary Schools shall designate three members of the Commission on Secondary Schools to serve on the Commission on Colleges and Universities. Secondary School members of the Commission shall serve four four-year terms or until expiration of their terms on the Commission on Secondary Schools, whichever is shorter.

5. The Commissioners representing each of the four types of institutions shall be organized as committees by type of institution. The committees by type of institution shall provide the mechanism through which consideration may be given to matters of particular interest to the different types of institutions. Within the general framework of Commission policies applicable to the entire higher institutional membership, and subject to Commission approval, these committees shall develop policies relative to the types of institutions they represent. With regard to the accreditation function the committees by type of institution shall serve as preliminary reviewing committees for the Board of Review. At the time of the Annual Meeting when actions on the accredited status of institutions are taken, each of the committees by type of institution shall act on the cases of institutions of its type. The action of the committee shall be in the form of a recommendation to the Board of Review based on the report of the

examiners, the self-survey report, an interview with the president of the institution, and discussion of the situation with the chairman of the examining team. This procedure shall be followed both for newly-applying institutions and for member institutions whose accredited status is under consideration.

The committees by type of institution shall meet at the time of the Annual Meeting of the Association. The normal expectation is that the expenses of Commissioners for attendance at the Annual Meeting will be paid by their institutions. Expenses of Commissioners for attendance at meetings of the committees by type held at times other than the time of the Annual Meeting will be paid by the Association.

6. The Commissioners from each of the five geographic districts shall be organized as district committees. District committees shall serve as local agencies of the Commission. As such they will be expected to stand ready to assist both member and non-member higher institutions in various ways, and may, in some instances, take the initiative in establishing contact with institutions faced with serious problems.

An institution seeking accreditation shall be advised by the Secretary of the Commission to seek the assistance of the district committee in carrying on its self-survey and in making other preparations for examination. It is expected that the district committee will review the self-survey report critically with a view to offering constructive advice on the institution's problems and, where it seems desirable, offer recommendations for strengthening the institution's weaknesses before an examination by the Association is requested. When the self-survey is filed with the Secretary of the Commission it should be accompanied by whatever

comments the district committee may care to make. However, the district committee shall have no responsibility for decision-making in the accreditation process; this shall be the responsibility of the committees by type of institution, the Board of Review, and the Commission as a whole.

In addition to its work with individual institutions each district committee shall serve as a unifying force among the higher institutions in its district through the conduct of group meetings, conferences, workshops, and the like for consideration of problems of common interest. It is recommended that each district committee schedule at least one district meeting each year but that the determination of the desirability or need of such meeting be entirely within the discretion of the district committee and the member colleges and universities in the district.

It shall be the responsibility of the district committees to maintain close relationships with the secondary schools of the district through cooperation with the state committees of the Commission on Secondary Schools. One way of maintaining this relationship is to invite one, two, or three of the high school representatives on the state committees to attend the meetings of the district committee.

Each district committee shall elect a chairman and a secretary. The secretary shall make arrangements for meetings and conferences and shall handle the correspondence and other business of the committee. It is to be hoped that in some if not all of the districts a member of the staff of one of the institutions, part of whose time could be freed for this activity, may be given the responsibility for discharging the secretary's duties. Each of the district committees shall be provided with a budget to defray the costs of traveling to institutions within the dis-

trict and of clerical and administrative activities involved in maintaining the office of the secretary of the committee.

7. The Board of Review of the Commission on Colleges and Universities shall be composed of nine persons elected by the Commission for staggered terms of five years without opportunity for re-election until one year has elapsed. The members of the Board of Review shall be selected with due regard for geographic distribution and institutional type but without specification as to the number from each geographic district or type of institution. If the term of a member of the Board expires before the expiration of his term on the Board he shall continue on the Commission as an added member until the expiration of his term on the Board.

The Secretary of the Commission, elected by the Commission, shall be *ex officio* secretary of the Board of Review. He shall serve for a four-year term and be eligible for re-election. The Secretary shall not be a member of the Board of Review or of the Commission.

8. One person in each member college and university shall be designated the official North Central Association representative. This person shall represent his institution at the Annual Meetings of the Association and shall be the member of the institutional staff to whom all communications relating to the activities of the Commission on Colleges and Universities will be directed. It is expected that the representative will be the president of the institution or someone designated by the president. In cases where the institutional representative is not the president, communications from the Commission on Colleges and Universities should be directed to both the designated representative and the president.

II. STATEMENT OF POLICY RELATIVE TO THE ACCREDITING OF INSTITUTIONS OF HIGHER EDUCATION¹

INTRODUCTION

THIS statement of policy defines certain principles that will be followed in accrediting institutions of higher education. It is stated in general terms and includes brief descriptions of those characteristics of an institution that will be examined as a basis of accreditation.

This statement of policy is supplemented by a manual which contains elaborations of the statements here given and detailed directions for the execution of the policy here set forth. Upon each important issue the *Manual* contains specific directions for the collection of information and such norms and criteria as will make possible a fair and intelligent evaluation of an institution.

MEMBERSHIP

The North Central Association of Colleges and Secondary Schools will accredit and admit to membership as an institution of higher education a university, college, junior college, or institution of similar character that is judged to be of acceptable quality in matters later defined in this statement of principles. In the interpretation of this policy the liberty to integrate the whole or a part of a secondary school with a higher institution will be permitted.

Eligibility for membership will be based upon the character of an institution as a whole, including all the units within its organization. In the case of units, such as professional schools, that fall within the areas of other accrediting agencies, the actions of such ac-

crediting agencies will be taken into account; but the Association does not bind itself to accept the judgment of these agencies.

PURPOSES OF ACCREDITING

The purposes of the Association in accrediting higher institutions are as follows:

1. To describe the characteristics of institutions worthy of public recognition as institutions of higher education
2. To guide prospective students in the choice of an institution of higher education that will meet their needs
3. To serve individual institutions as a guide in interinstitutional relationships, such as the transfer of students, the conduct of intercollegiate student activities, the placement of college graduates and the selection of college faculties
4. To assist secondary schools in the selection of teachers and in advising students as to a choice of institutions, and to promote in any other ways the co-ordination of secondary and higher education
5. To stimulate through its accrediting practices the improvement of higher education in the territory of the North Central Association

BASES OF ACCREDITING

An institution will be judged for accreditation upon the basis of the total pattern it presents as an institution of higher education. While institutions will be judged in terms of each of the characteristics noted in this statement of policy, it is recognized that wide variations will appear in the degree of excellence attained. It is accepted as a principle of procedure that superiority in some characteristic may be regarded as compensating, to some extent, for deficiencies in other respects. The facilities and activities of an institution will be judged in terms of the purposes it seeks to serve. An institution is not held to a set of minimum standards, violation of any one of which jeopardizes its accreditation.

¹ At the annual meeting of the Association in April, 1934, this statement of accrediting policy was unanimously adopted by the Association in lieu of the accrediting standards in use up to that time.

ELIGIBLE INSTITUTIONS

To be considered by the Association an institution must be incorporated as a nonprofit corporation devoted primarily to educational purposes and¹ legally authorized to confer collegiate degrees, or to offer a definitely described portion of a curriculum leading to such a degree, or to offer curriculums leading to an academic certificate. As a condition of eligibility an institution must include among its major functions the provision of general education as defined in the *Manual*. An approved institution is not barred from offering curriculums terminating at the end of one, two, or three years if they are taught at the level of collegiate instruction. The curriculum should presuppose the completion of a secondary-school curriculum as a condition for entrance to the institution, or secondary courses should be so integrated with the curriculum of the institution itself as to guarantee the educational progress of students to a definite stage of advancement beyond the completion of the usual secondary-school offering. Before an institution will be considered for accreditation, it must have been in operation long enough to make possible an evaluation of its program.

INDIVIDUALITY OF INSTITUTIONS

In its accrediting procedures the Association intends, within the general patterns of higher education, to observe such principles as will preserve whatever desirable individual qualities member institutions may have. While it is necessary to emphasize certain characteristics that are recognized as basic, such as the competence of the faculty, the representative character of the

curriculum, effective administration, standards of student accomplishment, and financial adequacy, it is regarded as of prime importance also to protect such institutional variations as appear to be educationally sound. Even in these basic matters it is clear that considerable divergence from average or optimum conditions may occur without perceptibly detracting from the essential educational worth of an institution. Uniformity in every detail of institutional policies and practices is believed to be not only unnecessary but undesirable. Well-conceived experiments aimed to improve educational processes are considered essential to the growth of higher institutions and will be encouraged.

PUBLISHED LIST OF ACCREDITED INSTITUTIONS

The Association will publish one list of accredited institutions of higher education. Attached to the name of each institution in the list will be notations relative to such objective facts as are pertinent to a description of the characteristics of an institution.

CONTINUING REVISION OF POLICY AND PROCEDURES

The effect of this program of accrediting upon the welfare of institutions is the vital matter in its formulation and adoption. Continuous study leading to adjustment and improvement is accepted as necessary to the full fruitage of the plan and will be considered an integral part of the regular accrediting activities of the Association. It shall be the policy of the Commission to study the operation of the principles given in this statement of policy and of the detailed procedures described in the *Manual*.

In pursuit of this policy there will be collected periodically from member institutions such information as will con-

¹ The words "incorporated as a nonprofit corporation devoted primarily to educational purposes and" were added to the Statement of Policy at the annual meeting of the Association in April, 1937.

tribute to the procedures of accrediting and will reveal the changing character of these institutions. It shall be the duty of the Secretary, with the counsel of the Board of Review, to conduct biennially a study in one of the following three areas: (1) faculty competence, (2) library, (3) finance. Other areas may be studied as the Board of Review deems desirable, but furnishing of information for general studies outside the three areas mentioned shall be on a voluntary basis on the part of member institutions. The report forms shall be adapted to characteristics of the several types of institutions represented in the Association, and constructed in the simplest form consistent with usefulness.

CRITERIA OF INSTITUTIONAL EXCELLENCE

I. PURPOSES AND CLIENTELE

Recognition will be given to the fact that the purposes of higher education are varied and that a particular institution may devote itself to a limited group of objectives and ignore others, except that no institution will be accredited that does not include among its major functions the provision of general education.

Every institution that applies for accreditation will offer a definition of its purposes that will include the following items:

1. A statement of its objectives in general education
2. A statement of the occupational objectives, if any, for which it offers training
3. A statement of its objectives in individual development of students, including health and physical competence

This statement of purposes must be accompanied by a statement of the institution's clientele showing the geographical area, the governmental unit, or the religious groups from which it draws students and from which financial support is derived.

The facilities and activities of an institution will be judged in terms of the purposes it seeks to serve.

II. FACULTY

An institution should have a competent faculty, organized for effective service, and working under satisfactory conditions.

In determining the competence of the faculty, consideration will be given to the amount and kind of education that the individual members have received, to their experience in educational work and to their scholarship as evidenced by scholarly publications and contact with learned societies. Attention will be given to the faculty requirements implied by the purposes of the institution. The educational qualifications of faculties in colleges of similar type will be considered in judging the competence of a faculty.

Under faculty organization consideration will be given to the number of the faculty in ratio to the number of students, to representation of the teaching fields, to the training of instructors in their fields of instruction, to group organization of the faculty, to faculty meetings, and to faculty committees.

Under satisfactory working conditions consideration will be given to the following: salary status; tenure; instructional load; recruiting, selection, and appointment; aids to faculty growth; and provisions for leaves of absence, retirement, insurance, housing, and recreation and community life.

III. CURRICULUM

The curriculum of an institution should contain the subject-matter offerings implied by its statement of objectives. These offerings will include provisions for general education, advanced courses when the purposes of an institution require such offerings, and special courses appropriate to the

specific objectives which the institution claims as among its functions.

The organization of the curriculum should be such as will best serve students of the type whose admission is implied by the declared purposes of the institution. Responsibility for the grouping of curriculum content, as by courses, departments, or divisions, will lie with institutions. The merit of a curriculum organization will be judged primarily by the manner in which it functions.

The curriculum of an institution will be regarded as effective only when the faculty includes instructors competent by reason of educational preparation to offer instruction in announced courses.

The institution should be able to show clearly that the curriculum as described in published statements is effectively administered in the case of individual students and that there is reasonable adherence to stated requirements in the awarding of degrees and certificates of progress.

IV. INSTRUCTION

An institution will be expected to show a sympathetic concern for the quality of instruction offered students and to give evidence of efforts to make instruction effective. Consideration will be given to the emphasis placed by the institution upon teaching competence in the selection and promotion of teachers, to the manner in which young instructors are inducted into teaching activities, to the aids that are provided as stimuli to the growth of individual members of the staff, to the institution's concern for high scholarship in students, to its emphasis upon the adjustment of the curriculum and teaching procedures to the abilities and interests of students, to efforts to make such examinations as are given more reliable and more accurate measures of student accomplishment, and to the alertness of the faculty to the instruc-

tional needs of students. Familiarity of the administration and faculty with current discussions of instructional problems at the college level and with recent experimental studies of college problems are further evidences of institutional alertness to the need for good college teaching.

V. LIBRARY

The library should provide the reading facilities needed to make the educational program effective, and there should be evidence that such facilities are appropriately used.

In estimating the adequacy of the library, attention will be given to the holdings of standard works of general and special reference, to the holdings of magazines and periodicals, and to the number and variety of books. The use of the library by students and by the faculty, library expenditures over a period of years, the salaries of the library staff, the qualifications of the staff, and the administrative practices relating to the library will all be considered in this connection.

VI. STUDENT PERSONNEL SERVICE

The policy of an institution in admitting students should be determined, on the one hand, by the purposes of the institution and, on the other, by the abilities, interests, and previous preparation of applicants. An institution should admit only those students whose educational interests are in harmony with the purposes of the institution and whose abilities and previous preparation qualify them to pursue the studies to which they are admitted.

The student personnel service of an institution should assist students to analyze and understand their problems and to adjust themselves to the life and work of the institution.

In evaluating the practices of an institution in the induction of students, attention will be given to the provision

for preregistration guidance in cooperation with secondary schools, to the criteria used in the selection of students, to the administration of the stated entrance requirements, and to the arrangements for introducing new students to the life and work of the institution.

Consideration will be given to the means employed by an institution to assist students in the selection of courses and curriculums, in solving immediate academic problems, in furthering their scholastic development, and in making suitable vocational choices and preparation. Attention will also be given to the practices of an institution in counseling students about their health, their financial affairs, and their intimate personal affairs. The student's relation to extra-curriculum activities will also be studied. The practices of an institution in the provision and control of health services, in the housing and boarding of students, in the management of extra-curriculum activities, in the control of student conduct, and in financial assistance to students will be considered.

VII. ADMINISTRATION

The administrative organization should be suitable for accomplishing the objectives of the institution. Adequate provision should be made for the performance of all administrative functions by a personnel competent in their respective lines of activity.

In evaluating the administration of an institution, the emphasis will be placed upon the manner in which the functions are performed rather than upon the organization or the personnel, although the suitability of the organization and the competence of the personnel cannot be ignored. Attention will be given to such matters as the constitution and activities of the board of control; the general system of ad-

ministrative control; the administration of academic matters, such as curriculum, faculty personnel, and instruction; the business administration, including financial accounting, budgeting, purchasing, the collection of revenues, and the supervision of the finances of student activities; the administration of the physical plant; the management of invested funds, if any; the administration of the student personnel service; the administration of special educational activities, if any, such as summer session or extension services; and the system of records and reports.

VIII. FINANCE

The institution should provide evidence of financial resources adequate for and effectively applied to the support of its educational program.

The items of information to be considered in determining the adequacy of the financial support are the expenditure per student for educational purposes,¹ the stability of the financing, as indicated by the amount of income per student from stable sources, and the avoidance of burdensome indebtedness; and the procedures in financial accounting and reporting. Necessary adjustments will be allowed for contributed services of instructors and administrative officers in Catholic institutions.

IX. PHYSICAL PLANT

The physical plant, comprising grounds, buildings, and equipment, should be adequate for the efficient conduct of the educational program and should contribute effectively to the realization of the accepted objectives of the institution.

¹ A phrase relating to the dependence of an institution upon student fees was deleted from the Statement of Policy at the annual meeting of the Association in April, 1937.

In judging the plant, consideration will be given to the adequacy and effectiveness of such features as site; general type of buildings; service systems; classrooms, laboratories, and other facilities appropriate to the special purposes of the institution; office facilities; library building; facilities for health service, recreation, and athletics; dormitories; auditoriums; assembly rooms; and the operation and care of the plant.

X. INSTITUTIONAL STUDY

An institution should continuously study its policies and procedures with a view to their improvement and should provide evidence that such useful studies are regularly made.

Consideration will be given to the means used by the institution in the investigation of its own problems, to the nature of the problems selected for study, to the staff making studies, to the methods employed, to the attitude of the administration toward and the support given to such studies, and to the manner in which the results are made available to the faculty, the administrative staff, and the interested clientele. It is recognized that such

studies may be of many sorts, ranging from small inquiries of immediate service value to elaborately conducted experimental investigations. They may deal with any phase of the work of an institution, such as administration, curriculum, student personnel service, instruction, or any other matter of immediate or remote concern to the institution. An institution will be requested to provide typed or printed copies of completed studies.

XI. ATHLETICS

If the institution maintains a program of intercollegiate athletics, the same policies should prevail in regard to faculty, administration, and the management of students as are in force in connection with the other features of the institution.

In evaluating the athletic program, consideration will be given to the requirements for eligibility for participation; the distribution of scholarships, loan funds, grants of financial aid, and remunerative employment; the methods taken to safeguard the health of participants; the administrative organization; the financial control; and the competence of the staff.

III. LIST OF ACCREDITED INSTITUTIONS OF HIGHER EDUCATION

July 1, 1955

Explanation of dates.—The dates listed are dates of membership. The first accredited list was published in 1913; no institution was accredited prior to that time.

A dash connecting two dates indicates continuous accreditation during the period specified, e.g., 1915–1919 means continuous accreditation from 1915 to 1919 inclusive. A date followed by a dash indicates continuous accreditation to and including the current year. A semicolon indicates that the institution was on the list for the

year or years specified but that it was not on the list for the following year, unless the next entry shows a change of classification for the latter years.

Designation of extent of program.—The symbol (M) or (D) after the name of an institution indicates that the institution offers a graduate program leading to the Master's or Doctor's degree, respectively, and that the accreditation of the institution includes its graduate work. Those institutions which are listed neither as junior colleges nor as having graduate programs

are Bachelor's degree-granting institutions or institutions with graduate programs that have not yet been accredited.

Proceedings of the Commission on Secondary Schools

I. REPORT OF THE COMMISSION

THE ANNUAL MEETING of the Commission on Secondary Schools of the North Central Association of Colleges and Secondary Schools opened with a meeting of the Administrative Committee at the Palmer House, in Chicago, on Sunday, March 20, 1955, at 7:00 P.M. The State Chairmen and the Administrative Committee held two meetings on Monday, March 21, 1955. The first was held at 9:00 A.M. and the second at 1:30 P.M. Much of the time was spent in discussing problems common to all and arriving at satisfactory solutions of those problems.

Chairman Floyd A. Miller had made extensive arrangements for caring for members of reviewing committees, including a card file of individuals who had indicated a desire to work on reviewing committees, and name cards for their lapel pockets, and admittance cards for the chairmen of the Committee on which they were to work. This helped to do away with much of the confusion which ordinarily obtains in getting individuals assigned to committees and getting work started. No individuals were assigned to Committees after 9:00 A.M.

Promptly at 9:00 A.M. on Tuesday, March 22, a total of 476 individuals sat down to review the reports of 3,343 high schools. By the end of the day, the work of the Reviewing Committees was completed. At 4:00 P.M., the chairmen, assistant chairmen, and secretaries of the Reviewing Committees met with the nineteen State Chairmen to report the results of the day's work and to permit any State Chairman who might question the decision of the Reviewing Committee relative to an individual school within his state, to raise questions, seek information concerning the reasons for the recommendation the Committee proposed, and, so far as possible, clear up all questions prior to the presentation of the recommendations of the Reviewing Committees to the Commission at its final business session. This procedure made it possible to discuss, clarify, and thus avoid differences of opinion. In the final analysis, it also saved time. When the reports of the various reviewing chairmen were completed, the State Chairmen expressed themselves as satisfied with the finding of the Reviewing Committees and extended to them their thanks for a big job well done.

Chairman Miller introduced a new feature this year which consisted of five discussion groups or "buzz sessions." These groups met at 2:00 P.M. on Tuesday, March 22. These meetings were for those who had completed their reviewing activities and for any others who were interested. The five sessions were similar in that each concerned itself with an analysis of reviewing committee activities and of the Policies, Regulations, and Criteria in general. The meeting places were all crowded and reports from them were all quite enthusiastic. Requests were made that the "buzz sessions" become a part of the regular program in the future.

Frank Byers, University of Illinois, Urbana, Illinois was the general chairman and the chairman and recorder of each group were as follows:

- Group 1—Chairman, Robert L. Fleming, Principal, South High School, Youngstown, Ohio
Recorder, H. F. Connors, Principal, Hurley High School, Hurley, Wisconsin
- Group 2—Chairman, Hazlitt H. Wubben, Principal, Huerfano County High School, Walsenburg, Colorado
Recorder, Roy Mayer, Principal of High School, North Platte, Nebraska
- Group 3—Chairman, Homer S. Anderson, Principal, Senior High School, Ponca City, Oklahoma
Recorder, Lewis F. Fowles, Principal of High School, Hastings, Nebraska
- Group 4—Chairman, Howard A. Latta, Principal, Webster Groves High School, Webster Groves, Missouri
Recorder, O. K. Caldwell, Principal of High School, Fostoria, Ohio
- Group 5—Chairman, Norman Thorpe, Principal, Teachers College High School, University of Nebraska, Lincoln, Nebraska
Recorder, William H. Griffiths, Superintendent of Schools, Portland, Michigan

The first business meeting of the Commission was held on Wednesday, March 23, at 9:30 A.M. with Chairman Floyd A. Miller presiding. At this time the Secretary presented his report, which by custom has become a brief review of the activities of the Administrative Committee since the last annual meeting. Brief reports were made by the following individuals for their respective committees:

- A. J. Gibson, American Dependents' Schools
- Stephen A. Romine, Cooperating Committee on Research
- Otto Hughes, Activities Committee
- A. J. Gibson, Report Forms
- Lowell B. Fisher, The Study of USAFI for the Department of Defense
- Walter L. Cooper, Subcommittee on School Library Study

The following individuals who were at the speakers' table were introduced:

- Dr. Earl R. Sifert, Director, Dependents' Education Organization, U. S. Armed Forces in Europe
- Mr. George Y. Wilkins, Head of the Overseas Dependents' Schools Branch, Department of the Navy, Washington, D. C.
- Mr. Thomas Petrus, Principal, Sendai American High School, Japan, represented Dr. R. B. Patin, Director of Dependents' Schools in the Far East
- Mr. Dan C. Miranda, Superintendent, Naples Dependents' Schools, Italy
- Dr. Farnham G. Pope, Dependents' School Section, Department of the Air Force, Washington, D. C.
- Mr. A. D. Robertson, Director, Dependents' Schools, U. S. Air Forces Europe, Germany

Previous to the meeting Chairman Miller had appointed a Nominating Committee composed of the following individuals:

Chairman, L. R. Kilzer, University of Wyoming, Laramie, Wyoming
 R. M. Garrison, State Department of Education, Columbus, Ohio
 R. G. Chamberlin, Principal, Rufus King High School, Milwaukee, Wisconsin

The report of the Nominating Committee was called for. Dr. Kilzer, reporting for the Committee, placed the following names in nomination:

For Chairman of the Commission—Floyd A. Miller, State Department of Public Instruction, Lincoln, Nebraska

For member of the Administrative Committee—Wayne C. Blough, Principal Shaw Senior High School, East Cleveland, Ohio

For the Class of 1958:

J. D. Clary, Superintendent of Schools, Stuttgart, Arkansas
 L. W. Thomson, Principal of High School, Leadville, Colorado
 Kenneth Peterson, Principal of High School, Hibbing, Minnesota
 Guy Waid, Principal of High School, Carlsbad, New Mexico
 Warren L. Evenson, Principal of Senior High School, Fargo, North Dakota
 J. C. Quigg, Superintendent of Schools, Greybull, Wyoming

The report of the Committee was accepted and the Chairman then called for nominations from the floor. None being offered, it was moved and seconded that the individuals named by the nominating committee be elected to the respective offices. Motion carried unanimously. The meeting adjourned at 11:45 A.M.

The final business meeting of the Commission was held at 2:00 P.M. on Wednesday, March 23.

After roll call by the Secretary, the Reviewing Committees reported to the Commission and made the following recommendations, which were accepted unanimously:

For unqualified approval.....	2,316
To be advised.....	804
To be warned.....	146
Schools dropped or withdrawn.....	12
New schools to be added.....	77

Total membership of secondary schools in the Association now stands at 3,343.

A proposed amendment to Regulation III-B-(1-b) of the *Policies, Regulations, and Criteria for the Approval of Secondary Schools*, as suggested by the State Chairmen and approved by the Administrative Committee and the Executive Committee, was presented to the Commission for consideration. The amendment was approved and the Secretary was instructed to conduct a referendum on the proposed amendment, which reads as follows:

The Librarian meets the requirements of Regulation III-A (1) and (2). In a school with an enrollment of 200 or more pupils, the librarian has completed a minimum of 15 semester hours of library science. In a school with an enrollment of less than 200 pupils, the librarian has completed a minimum of 6 semester hours of library science by September, 1955, and shall continue to make reasonable progress toward the standard of 15 semester hours in library science after that date.

The meeting was adjourned at 3:30 P.M.

V. POLICIES, REGULATIONS, AND CRITERIA FOR THE APPROVAL OF SECONDARY SCHOOLS

GUIDING PRINCIPLES

I. An institution should be judged upon the basis of the total pattern it presents as an institution of its type. While it seems necessary that institutions be judged in terms of particular characteristics, it should be recognized that wide variations will appear in the degree of success achieved.

II. It should be accepted as a principle of procedure that deficiency in one field may be compensated for by strength in other fields—no school should be denied accreditation because it fails to meet a specific standard, if its total pattern of achievement is good.

III. A school should be judged, in so far as is possible, in terms of its own philosophy and the purpose which it serves in its own community. The fact should be recognized that individual differences exist among schools and among communities.

IV. Criteria should be flexible, and of a type that can readily adjust themselves to changing conditions.

V. Objective criteria should be based upon a sufficient amount of research and experimentation to establish their validity as measuring instruments.

VI. While it seems desirable that criteria regard as basic certain characteristics, such as faculty preparation, the intellectual and moral tone of a school, the nature of the school plant, the adequacy of equipment and supplies, the quality of the school library and library service, the condition of the records, the policies of the board of education, the financial status, the teaching load, and the educational program, it should be recognized that considerable divergence from normal standards may occur in one of these characteristics without greatly detracting from the educational merits of an institution. Uniformity in every detail

stifles educational experimentation and is not only unnecessary but undesirable.

VII. Criteria, to be of maximum value, should be stimulating and conducive to educational growth; they should be instruments for continuous self-evaluation and should provide the incentive to strive constantly toward higher goals of achievement.

POLICIES OF THE COMMISSION ON SECONDARY SCHOOLS

POLICY I

A school which has submitted its annual report to the State Committee which is in the highest class of schools as officially listed by the properly constituted educational authorities of the state and which has been approved continuously for five years shall not be dropped without a year's warning except by a three-fourths vote of the members of the Commission present. A school which has not been approved continuously for five years may be dropped without warning.

POLICY II

It is the policy of the Commission to recommend the removal from the approved list of the Association of any school which, after a year's warning, continues to violate the same Regulation or Criterion which was violated the previous year. Upon the recommendation of the State Committee, however, this policy may be waived by a three-fourths vote of the Commission members present.

State Committees are encouraged to advise a school which has been warned for violation of a Regulation or a Criterion to submit to an evaluation, using the *Evaluative Criteria*.¹ This evalua-

tion is to be carried out when, in the opinion of the State Committee, it will assist in improving the condition for which the school was warned, or in explaining the extenuating circumstances which may justify a second warning, or even the discontinuance of the warning.

POLICY III

Secondary schools are approved for an indefinite period. All schools on the approved list, however, shall submit such reports as the Commission may require. The certificate showing that a school is approved by the Association is valid as long as the school meets the conditions for approval as defined by the commission on Secondary Schools and approved by the Association.

POLICY IV

Credits acquired through summer session work, extension courses, correspondence courses, or state examinations will be accepted by the Association as counting toward the preparation of the teacher, if such credits are accepted by an approved institution of higher education.

The Association recognizes that credit established in accordance with the recommendations in *A Guide to the Evaluation of Educational Experiences in the Armed Services*² is sound. Such credit may be counted as a part of the preparation of the teacher, when accepted by an approved institution of higher education.

POLICY V

The Chairman of the State Committee is the official agent of communication between the approved schools of the state and the Secretary of the Commission on Secondary Schools. He is responsible to the Commission for the distribution, collection, and filing of all reports, and for such other duties as the Association may direct.

The Chairman of the State Committee shall be either the Committee representative of the State University or of the State Department of Education and shall be selected by majority vote of the State Committee subject to the approval of the Executive Committee. He shall be elected for a term of four years, and shall be eligible to succeed himself, but may continue in office only so long as he is a member of the State Committee.

In the event of a vacancy in the chairmanship during the term of office of an incumbent, the State Committee shall elect a chairman to complete the unexpired term. The meeting for this purpose will be called by the secondary school representative having the longest tenure on the committee.

POLICY VI

The interim authority for interpreting Policies, Regulations, and Criteria for the Approval of Secondary Schools is the Secretary of the Commission on Secondary Schools.

POLICY VII

It is the policy of the Association to warn high schools for violation of the conditions for eligibility to the approved list of the Association and to drop from this list any high school which violates the same Regulation or Criterion during consecutive years. High schools may also be warned or dropped whenever it becomes evident that they frequently violate conditions for eligibility to the approved list. In the case of a minor violation, the Association may instruct the State Committee to advise the school concerned. It is the policy of the Association not to take an action which is different from that recommended by the State Committee without first notifying the committee of the state concerned.

² For *Earning Secondary-School Credit in The Armed Forces*, write to the National Association of Secondary-School Principals, National Education Association, 1201 Sixteenth Street, N.W., Washington 6, D.C.

State Committees are encouraged to advise a school which has been warned for violation of a Regulation or a Criterion to submit to an evaluation, using the *Evaluative Criteria*. (See Policy II.)

POLICY VIII

In the case of individual schools of any state, reasonable deviations from Regulations and Criteria may be accepted by the Commission and approved by the Association when recommended by the State Committee. Such recommendations must be supported by substantial evidence showing that these deviations are justifiable.

No school should be denied approval if it fails to meet fully all Criteria and Regulations, provided its total educational pattern is good, as revealed by the results of a competent survey or other evidence. Policy VIII also applies to new schools seeking admission. State Committees are justified in expecting closer adherence to published regulations and criteria in the case of new schools. Special attention should be given to the reports of State Committees which have used the *Evaluative Criteria* as one of the steps to be taken by new schools in making their application for admission. It is recommended that State Committees ask each prospective new school to carry out at least a self evaluation using the *Evaluative Criteria*. Such schools should be encouraged to use the full Cooperative Study procedure, supplemented by a review of the self evaluation by a visiting committee or by the State Committee.

The conditions for eligibility to the approved list of member schools of the Association are included under two separate classifications: Regulations and Criteria.

REGULATIONS

Regulations are those yardsticks which serve to assist schools which are members of the Association with definite guidance as to the necessary minima to be observed. In other words, regulations are floors below which there seems to be agreement that schools may not fall and still be of the type that should be considered good schools according to the Association's Criteria.

REGULATION I

The Annual Report Blank

The Association is under no obligation to consider a school for unqualified approval unless the annual report blanks have been properly and completely filled out and placed on file with the State Chairman on the dates determined by the Commission.

REGULATION II

Organization of the School

A secondary school shall base its report on all grades included in its organization.³

REGULATION III

Qualifications of Staff Members⁴

A. Instructional Staff

1. *General Preparation.* a. All members of the instructional staff possess a Bachelor's degree from an institution of higher education approved by the North Central Association of Colleges and Secondary Schools or from an institution of equal standing. (Exceptions may be made when recommended by the State Committee in the case of teachers of trades, if these teachers are legally qualified to teach in the state and have had the apprenticeship training required in their respective trades.)

b. Graduates of colleges not recognized by the North Central Association or by any other regional accrediting agency may become eligible to teach in a secondary school accredited by the Association by being admitted to graduate standing in an institution of

³ A change in reporting the organization of a school shall be approved by the State Committee.

⁴ Except where specifically stated (as in the case of library personnel), requirements pertaining to staff preparation are not retroactive and do not invalidate the qualification of a staff member who was fully qualified under the standards applicable at the time of his appointment to his present position.

higher education accredited by the Association or by any other regional accrediting agency, and by completing successfully not less than six semester hours of graduate work. This part of the Regulation is not to apply to graduates of non-accredited colleges who desire to teach in the state in which they were graduated, when approved individually in accordance with the policy of the State Committee.

c. Teachers in school systems having two or more high schools, who are transferred by the administrative officer from one school to another, and who, though not fully qualified, have been accepted previously by the Association, when they teach the same subjects in a new school as they were teaching in their former position, shall be accepted by the Association as properly qualified teachers, provided that the system encourages teachers who are not fully qualified to continue their educational preparation, and that evidence exists that progress is being made.⁵

2. *Professional Preparation.* The minimum professional preparation of individual members of the instructional staff is fifteen semester hours of education. In the case of a teacher whose professional preparation consists of less than fifteen semester hours, the State Committee shall have power to waive this Regulation if, in its judgment, the teacher is otherwise highly qualified and is doing clearly superior work.

3. *Preparation in Teaching Areas.*
a. Adequate preparation in teaching fields and areas is defined as that which meets the legal requirements of the state in which the school is located and also any special requirements set up by

legally constituted educational authorities of the state, provided, however, that the minimum preparation is fifteen semester hours at the college level in any one of the following areas: language arts, a foreign language, social studies, science, mathematics, business, health and physical education, music, art, home economics, agriculture, and industrial arts, and adequate preparation in each subject taught.⁶ In the case of a teacher who devotes a minor fraction of his time to the teaching of a particular subject, a reasonable deviation from the minimum preparation may be accepted when approved by the State Committee.

b. In the case of unified courses which draw their subject matter from two or more teaching fields, the minimum preparation expected will be twenty semester hours on the college level, appropriately distributed among the teaching fields concerned.

c. Each State Committee will submit to the Secretary of the Commission on Secondary Schools the requirements of the properly constituted educational authorities of the state pertaining to the preparation of teachers in subject fields and areas.

4. *Records of Teachers' Preparation.* An official transcript or a certified copy of the college preparation of each teacher is kept on file in the office of the administrative head of the school or school system. All information which pertains to the preparation of teachers is secured from such official records. An official transcript is the institutional credit record signed by the registering officer of the higher institution certifying the credits. Its submission to the State Chairman for evaluation may be

⁵ In the case of church schools, "school system" is taken to mean a group of schools under the central administrative control of a particular religious order or diocesan superintendent.

⁶ Deductions in mathematics or in any one foreign language may be allowed to the extent of two semester hours for each unit earned in high school, not to exceed a total deduction of six semester hours.

required. A certified copy of the transcript may be accepted.

B. *Library Staff*⁷

1. *The Librarian.* a. In schools with an enrollment of 500 or more pupils, the librarian is a full-time librarian. In schools with an enrollment of 200-499 pupils, the librarian may be a full-time librarian, a study-hall librarian, or a teacher-librarian; at least half the time of a teacher-librarian is devoted to the library. In schools with an enrollment of less than 200 pupils, at least two periods a day of the teacher-librarian's time are devoted to the library.

b. The librarian meets the requirements of Regulation IIIA-1 and 2. In a school with an enrollment of 500 or more pupils, the librarian has completed a minimum of 24 semester hours of library science. In a school with an enrollment of 200-499 pupils, the librarian has completed a minimum of 15 semester hours of library science. In a school with an enrollment of less than 200 pupils, the librarian has completed a minimum of 6 semester hours in library science.

c. The work in library science includes such courses as the following: school library organization and administration, cataloguing and classification, book selection and acquisition with emphasis on the reading and needs of adolescents, reference material, and general bibliography.

2. *Assistants.* Provision is made for an adequate number of assistants to the librarian, either as assistant-librarians or as pupil-librarians.

C. *Other Professional Staff* (physician, dentist, nurse, psychiatrist, psychologist)

Members of the non-instructional

professional staff meet the requirements of the state in which the school is located.

D. *Clerical Staff*

Adequate clerical assistance is provided. The qualifications of such personnel include, as a minimum, high school graduation and preparation in office practice.

E. *Custodial Staff*

The members of the custodial staff meet the state requirements pertaining to their training and employment.

REGULATION IV

Administrative Staff

A. *Principal*

The principal (or the administrative head of the secondary school) has had at least two years of teaching experience and possesses as a minimum a Master's degree from an institution of higher education qualified to offer graduate work. His preparation in school administration and supervision includes an appropriate distribution of graduate work covering those phases of the school administrator's work which are professional in character, such as secondary school administration, curriculum making, the supervision of instruction, methods of teaching, philosophy of education, history of education, pupil activities, guidance, health and safety, vocational education, personnel records and reports, and school finance. Anyone who holds the title of principal meets the foregoing requirements.

B. *Superintendent*

The superintendent of schools or the administrative head of the school system has the teaching experience and professional preparation described in Regulation IVA.

⁷ Regulation IIIB shall be in force upon adoption, but exceptions may be made by the State Committee until the school year 1955-56.

C. *Supervisory and Guidance Assistants*

Any member of the faculty who assists the administrative head of the school in the supervision of instruction possesses, as a minimum, the requirements specified in Regulation IIIA-1 and 2, and, in addition, an appropriate distribution of graduate work in such fields as the supervision of instruction in the secondary school, personnel and guidance, methods of teaching, educational psychology, and philosophy of education.

REGULATION V

Length of School Year

The minimum length of the school year is thirty-six weeks, 180 days, with a minimum of 172 days of classes actually in session.

REGULATION VI

Length of Class Period

A. A school may elect to conduct classes on the short period basis, the long period basis, or a combination of the two. The minimum length of the short class period for one unit of credit is defined as 40 minutes, exclusive of all time used in the changing of classes or teachers, five times a week for thirty-six weeks, or 180 days. Under this plan, two class periods necessitating little or no preparation outside of class are considered as equivalent to one period of prepared class work.

B. The length of the laboratory or long class period, for one unit of credit and for the purposes of this Regulation, is defined as a minimum of 55 minutes exclusive of all time used for the changing of classes or teachers. Under the long period plan, directed study may be substituted for the outside preparation required for the short period class. Under the short or the long period plan, however, a reasonable amount of outside or independent study by pupils in

accordance with their abilities is encouraged.

REGULATION VII

Requirements for Graduation

A. A three-year senior high school requires a minimum of twelve units, or 120 semester hours, for graduation. Four-year senior high schools require a minimum of sixteen units, or 160 semester hours, for graduation. Six-year high schools require a minimum of twelve units, or 120 semester hours, earned in the upper three years. (See Regulation II.)

B. A semester hour is defined as the amount of credit granted for the completion of a course covering one semester and consisting of one class period weekly, as defined in Regulation VI.

C. In order to permit variation from the foregoing definitions of a quantitative unit of credit based upon time element and to stimulate improved standards of scholarship, the school may elect to grant credit on a qualitative basis. School authorities, therefore, are encouraged to determine credit through the use of approved end-of-course tests. These tests measure the achievement ordinarily required for credit in a one or two semester course. Any supplementary evidence which may be considered necessary or desirable to establish the validity of such credit may be required.

D. State Committees are empowered to approve this plan for those schools wishing to adopt it, provided the school has personnel trained for the administration of such testing program. The scores of such tests may be used for the transfer of credit to other schools and to colleges.

E. Tests may be used to classify individuals entering school with educational experience for which regular transcripts of credit are not available. Each individual thus tested is placed

in the educational courses best suited to his needs.

REGULATION VIII

Size of School

An approved school employs, as a minimum, a number of teachers whose full-time equivalency is one in excess of the number of years in the organization of the school.

REGULATION IX

Pupil Load

In order to protect the social as well as the intellectual maturity of the pupil, it is advisable that he have four years experience in a four-year high school or three years experience in a three-year high school in order to graduate.⁸ In exceptional cases, pupils may be allowed to graduate in less than the time specified above, provided that adequate guidance procedures have been followed.

REGULATION X

Teaching Load

In determining the teaching load, consideration is given to the following components: the number of periods of class teaching, the number of different preparations, study hall duty, class size, total number of pupils taught daily, the demands made in the way of any guidance and supervisory activities, and the duties involved in the sponsorship of pupil activities. Due allowance is made in computing the teacher load for special assignments to committee work whose purpose is to improve any phase of the school program. The desirable maximum equivalency of a combination of such duties is six periods daily for the short period schedule, and five periods daily for the

lengthened period schedule. A teaching load in excess of seven periods daily, including study hall assignments, for the short period schedule and six periods daily, including study hall assignments, for the lengthened period schedule is considered a violation of this Regulation. The total teaching load is not excessive and is distributed equitably among the teaching staff.⁹

REGULATION XI

Library Expenditures

A. That part of the annual secondary school budget devoted to library expenditures varies according to the size of the school; the smaller the school, the greater the pupil per capita expenditure. A minimum amount of \$200.00 is expended annually in each secondary school for the purchase of library books, periodicals, newspapers, pamphlets, vertical file materials, and supplies.

B. The budget is planned in accordance with the library needs as shown by the annual library inventory and in accordance with the school's objectives for library service. The following scale of annual expenditures is recommended as a guide:

1. Schools with an enrollment of 1000 or more pupils expend approximately 50 cents per pupil.

2. Schools with an enrollment of 500 to 999 pupils expend approximately 75 cents per pupil.

3. Schools with an enrollment of 200 to 499 pupils expend approximately \$1.00 per pupil.

4. Schools with an enrollment of less

⁸ If the school has a summer session, the time spent may be counted as a proportionate part of the school year.

⁹ An average enrollment in the school in excess of thirty pupils per teacher is considered as a violation of this Regulation. For the purpose of interpreting this Regulation, the principal, vice-principals, study hall teachers, vocational advisers, librarians, and other supervisory officers may be counted as teachers for such portion of their time as they devote to the management of the high school.

than 200 pupils expend not less than \$200.00.

REGULATION XII

Financial Support

The financial condition of the school district or governing body is such that it is possible for the school to meet the conditions for accreditation and to maintain reasonably well standards of excellence as indicated in the Criteria.

CRITERIA

The standards of excellence which a school holding membership in the North Central Association is expected to maintain are based on statements in the *Evaluative Criteria*, as developed by the Cooperative Study of Secondary School Standards.

CRITERION I

Philosophy and Objectives

A. Pupil Population and School Community

Since the school exists for the educational needs of its constituency, it should be familiar with the distinctive characteristics of the community, such as its sociological composition, its social, economic, religious, recreational and educational institutions and agencies, and the educational needs of both youth and adults. Since the local community is also a part of the state, nation, and world, the school must also be concerned with an understanding of the social, political, economic, and other forces of these larger communities and with the development of the ability of all peoples to live together in one world. A school, therefore, should develop its philosophy and objectives from an analysis of such social factors.

B. Philosophy of the School

Each school should be free to determine its philosophy to the extent that

it promotes the principles and spirit of American democracy. The statement of philosophy should be written, implemented by a specific statement of objectives, and manifested in the educational program of the school.

CRITERION II

Educational Program

A. Basic Principles

1. The educational program of the school is concerned with more than the accumulation of knowledge, development of skills, and improvement of understandings. The development of interest, tastes, appreciations, ideals, and attitudes, and the functioning of all these elements in a democratic society should be included in the educational program.

2. An educational program which is concerned only with preparation for college can no longer be considered an adequate offering for a school, although preparation for college should continue to be one function of secondary education. The program should provide for the interests, needs, and abilities of all pupils as well as for the requirements of the community and the public supporting the school.

3. The evaluation of an educational program should be made in terms of the curriculum and courses of study, pupil activities, the library, guidance, instruction, and outcomes.

B. Curriculum

1. The curriculum should be chiefly concerned with the orientation, guidance, instruction, and participation of youth in those significant areas of living for which education should supplement the work of other social institutions.

2. Constant adaptation and development of the curriculum should be a

cooperative enterprise engaging all staff members, carried on under competent leadership, and using all available resources. Carefully conducted and supervised experimentation for curriculum development is desirable.

C. *Pupil Activity Program*

The pupil activity program should aim to develop desirable social traits and behavior patterns in an environment favorable to their growth. Special importance should be attached to provision for pupil participation through student councils or similar organizations in the administration of those school functions which especially concern the interest and welfare of pupils. The activity program should not only provide opportunity for developing leadership ability but should stimulate active participation of all pupils in appropriate school organizations and community activities.

D. *Library Service*

1. The library is easily accessible to pupils, adequate in size, and attractive in appearance.

2. Adequate provisions for the school library should include the following: a. A well-educated, efficient librarian; b. books and periodicals to supply the needs for reference, research, and cultural and inspirational reading; c. provision for keeping all materials fully catalogued and well organized; d. a budget which provides adequately for the maintenance and improvement of the library; e. encouragement of pupils in the development of the habit of reading and enjoying books and periodicals of good quality and real value; f. continuous and systematic use of the library by teachers.

E. *Guidance Service*

Guidance, as applied to the secondary school, should be thought of as a

service designed to give systematic aid to pupils in making adjustments to various types of problems which they must meet—*educational, vocational, health, moral, social, civic and personal*. Guidance activities should be organized into a definite program in which each staff member is a responsible participant. Where counselors are available, they should be responsible not only for specific activities but for stimulating and assisting teachers in their guidance activities.

F. *Instruction*

1. In the instructional program evidence should be found of: a. goals or objectives appropriate to the degree of development of pupils and in keeping with the purposes of the school; b. the selection and use of varied types of teaching and learning materials and experiences; c. the adjustment of method and organization to conditions and needs of pupils as a group and as individuals; d. the use of every legitimate means available in the evaluation of progress and quality of learning; e. a personal relationship of confidence, respect, and helpfulness between teachers and pupils, resulting in similar relationships between school and community; f. provision for all desirable types of learnings; g. definite and adequate learning by pupils as an outcome.

2. The efficiency of instruction, the acquired habits of thought and study, the general intellectual and moral tone of a school, and the cooperative attitude of the community are paramount factors. Only schools that rank well in these particulars are considered eligible for the list of schools approved by the Association.

G. *Evaluation of Outcomes*

1. In the educational program of a good secondary school, major concern should be given to attaining desirable

outcomes and to the various kinds of evidence indicating that such outcomes are being realized.

2. The results of the learning process should include: a. factual information or knowledge; b. meaning and understanding; c. abilities to do—knowledge and understanding combined with skill; d. desirable attitudes—scientific, social, moral, and others; e. worthy ideals, purposes, appreciations, and interests; and f. resultant intelligent participation in general life activities.

CRITERION III

School Staff

A. Instructional Staff

1. The staff should be a group of individually competent persons, organized into a cooperative body, having common purposes and motivated by the philosophy and objectives of the school. Diversity of preparation and viewpoints is desirable for a well-rounded staff, but its members should have the ability and the desire to work together, cheerfully, harmoniously, and efficiently for the good of the school and its pupils. Each member of such a staff should give evidence of awareness and understanding of educational problems and of *continuous professional growth*.

2. The number of staff members should be adequate for the curriculum offered, the school's enrollment, and the special needs of the pupils and the community. The teaching load and the total working load should be such as not to endanger the special needs of pupils.

3. Each staff member should have broad, general scholarship, thorough preparation in his special field, professional competence, and reasonable social development. In the selection of individual staff members, attention should be given to teaching ability,

personality, health, and character. In evaluating the adequacy of the general preparation of the instructional staff, State Committees will take into consideration the extent to which the staff as a whole has completed work beyond the Bachelor's degree, the kind and distribution of college courses taken, the recency of their completion, and other evidences of professional growth.

4. Teachers should receive salaries adequate to insure a living standard comparable with the social demands on the profession and the worth of their service, as well as to provide security for old age.

B. Librarian

The library staff has a broad, general education, a good understanding of the school's philosophy of education and of its educational program, and some successful teaching experience. The staff has the ability to work effectively with teachers in finding and using suitable library materials and aids in teaching and learning, to work agreeably and effectively with pupils, and to teach them to find and use library material readily and effectively.

C. Other Professional Staff

The services of such personnel as physician, dentist, nurse, psychiatrist, psychologist, speech correctionist and hearing therapist are desirable and should be adequate to the needs of the school.

D. Clerical Staff

The clerical assistance necessary for an effective program of instruction, administration, and supervision should be provided.

E. Custodial Staff

The number of custodial staff members should be adequate to keep the school plant in sanitary and efficient

operation. They should be trustworthy, resourceful, and cooperative.

F. *Health Examination*

It is recommended that a health examination be given to every new employee and periodically to every staff employee.

CRITERION IV

*Administration and Supervision*¹⁰

A. *The Board of Education*

Responsibility for determining the general policies of the school system is entrusted to a governing board, hereafter designated as the board of education. The board functions only when in official session; at other times its members have no authority in school matters, except as specifically authorized by the board. The administrative head of the schools is the chief executive officer of the board of education. Subject to the approval of the board of education, the administrative head is responsible for the selection and assignment of all school employees, the business management of the schools including school plant and equipment, the administration and supervision of the educational program, and the program of public relations. These duties necessitate organization of resources, both material and personal; delegation of duties and authority; and supervision of all delegated tasks and of all individuals to whom authority and responsibility are assigned. The better the administrative personnel, the more efficient will be the organization and management and the greater the probability of the successful attainment of the school's objectives, provided the personnel is always mindful of the

primary function of the school—the development of its pupils. Success should be measured in terms of results, not of machinery.

B. *Policies of the Board of Education*

1. The policies of the board of education are such as to encourage a maximum of educational growth and development. The board of education has a published statement of policy.

2. The policies of the board of education are such as to attract and retain the services of well-qualified and competent staff members and a well-trained school administrator who is capable of providing effective educational leadership. It is the policy of the board under which an accredited high school operates to employ, promote, demote, and discharge staff members and other employees only upon the recommendation of the administrative head of the school system.

3. No employee is dismissed during the term of a contract or refused reemployment except at an official meeting of the board of education. The minutes of such a meeting clearly indicate all actions taken by the board. Employees who are to be dismissed or refused reemployment are given reasons for the action taken by the board of education and are given an opportunity for a hearing before official action is taken.

4. The administrative head of the school system attends all meetings of the board of education except that part of a meeting when his own employment is under consideration.

5. The board of education deals with staff members and other school employees only through the administrative head of the school system.

6. The administrative head of the school system is held responsible for the board of education for submitting a carefully planned budget and for the

¹⁰ In the case of private schools or church schools, by "Board of Education" is to be understood the individual or group performing the functions of the board of education which are considered in Criterion IV.

expenditure of money in accordance with the budget adopted. He keeps those members of the staff who have responsibility for the proper expenditure of school funds informed as to the balances remaining in that part of the budget which relates to their departments.

7. The administrative head of the school system should share with the controlling board responsibility for establishing and maintaining desirable relations with the school's public. Therefore the supporting public should be informed regarding the policies, program, objectives, activities, and plans for the future of the school so that the support of the public be assured for the school's undertakings. There should always be a sympathetic and understanding relationship between the school and its administration on the one hand and its public on the other.

C. Cooperative Relationships

The working relationships between the board of education and the administrative head of the system, between the administrative head of the system and the principal of the secondary school, and between principal and staff are such as to insure successful and effective administration. Administrative procedures should be carried on by democratic processes which recognize the abilities and contributions of staff members.

D. Administration

1. The administration of the school is such as to insure a well-organized and well-managed school, effectively and intelligently supervised, and meeting the needs and interests of the pupils and of the community. Effectiveness of organization, permanency of tenure of all staff members, as shown by the history of the school, and the attitude

and support of the community are matters which will be taken into consideration in determining whether the school is eligible for accrediting.

2. Interference with the administration of the high school by individuals or organized groups either inside or outside the school, when such interference is likely to result in a lowering of the effectiveness of the educational program, will be considered sufficient grounds for an official visit and inquiry into the condition of the school.

E. Supervision

Supervision includes the improvement of every phase of the educational program, such as the organization of programs of studies, the revision of curricula, the instructional procedures, the pupil activity program, and the non-instructional activities of staff members. The administrator directly in charge of a secondary school should have ample time during the school day for the administration and supervision of his school.

F. Administration of the Activity Program

A secondary school should not participate in any district, state, interstate, or regional athletic, music, commercial, speech, or other contest, tournament, congress, or assemblage involving the participation of more than two schools, except those approved by the State Committee, or by that organization recognized by the State Committee as constituting the highest authority for the regulation and control of such activities. It should be the responsibility of the State Committee to furnish member schools with a list of approved contests, tournaments, congresses, and assemblages. The State Committee should give prompt action on requests for the approval of activities.

G. *System of Records and Reports*

A school should maintain a type of personnel and record system of such nature that it can provide any of the data asked for in the Criteria.

CRITERION V

School Plant, Equipment and Supplies

A. *Building and Site*

The school plant should be flexible, adequate in size, and so planned as to facilitate the offering of a modern program of secondary education that is suited to the needs and interests of the pupils and of the community. When a new plant is being planned, or an existing building is to be enlarged or remodeled, plans should contemplate meeting future as well as present needs. The building should be attractive and appropriate in design and should assure the safety and health of its occupants. The site should be large enough to provide ample playground space and should be attractively landscaped.

B. *Sanitation*

Janitorial service, lighting, heating, ventilation, water supply and drinking fountains, lavatories and toilets, wardrobes and lockers, school furniture, and location of the classrooms, shops, laboratory, and library should be such as to insure hygienic conditions for pupils and teachers.

C. *Safety*

Proper steps for protecting pupils against injuries should be taken in laboratories, shops, gymnasiums, transportation facilities, and in all parts of the building or grounds where accidents are likely to occur. The school plant should be adequately protected against fire and should have fire exits.

D. *Instructional Equipment and Supplies*

Instructional equipment and supplies, such as: science apparatus, laboratory tables and demonstration desks; shop tools and machinery; gymnasium equipment and supplies; equipment for home economics and agricultural laboratories; equipment and supplies for commercial, art, and music rooms; audio-visual aids equipment; maps and charts; library books, text books, and supplies should be adequate and used in such a way as to meet the needs of instruction for all courses and activities offered.

E. *Library*

1. *Materials.* The library should be conceived of as a communications center. The number and kind of library and reference books, periodicals, newspapers, pamphlets, information files, audio-visual materials, and other learning aids should be adequate¹¹ for the number of pupils and the needs of instruction in all courses offered.

2. *Location and Equipment.* a. The library room, or combination library-study hall, should be easily accessible, should accommodate approximately ten percent of the enrollment, should be attractive in appearance, and should contain standard library equipment, such as: reading tables, desks or desk-chairs, chairs, librarian's desk, cabinets for card catalogs, magazine and newspaper racks, dictionary stands, and filing cabinets. In judging the adequacy of library space, consideration should be given to modifying factors in individual schools and to the extent to which library facilities are decentralized.

b. The record system should include

¹¹ Quality of service and adequacy may be measured by the use of Section F, Library Services of the *Evaluative Criteria*.

a shelf list, alphabetically arranged card catalogs, an accession record, and should be classified by the Dewey Decimal system or other classification system acceptable to the State Committee. The central library may be supplemented by departmental or classroom libraries of frequently changed materials appropriate to the work of individual classes.

F. Special Services

Adequate provision should be made according to the individual needs of each school for such special services as rest rooms, cafeteria, dining rooms,

kitchens, clinics, infirmary facilities, and study and sleeping quarters.

G. Protection of Pupil Records; Care and Storage of Equipment and Supplies

Ample provision should be made for the safekeeping, systematic arrangement, and care of all materials, supplies, and apparatus used in the instructional and activity program, and the storage of all financial and personnel records and reports. An annual inventory is made of all equipment and supplies. A fireproof vault should be provided, or a safe which meets underwriters' specifications.

State Department of Education, Charleston, West Virginia*

Trends in Secondary Schools

SUMMARY OF STATISTICAL INFORMATION FOR SECONDARY SCHOOLS ACCREDITED BY THE ASSOCIATION FOR THE SCHOOL YEAR 1953-54

DATA presented in the tables which follow are compiled from the Annual Report on Report on Regulations (Form A-1) as submitted by member schools and summarized for the several states. They indicate trends in the more significant items included in that report. For each item returns are given for the nineteen states, the Dependents' Schools, and the Association as a whole. For purposes of comparison, the totals for the preceding five years are presented at the bottom of each table, except in a few instances where comparable figures are not available. The data have been compiled for schools in four categories of size—fewer than 200 pupils; 200-499; 500-999; and more than 1,000. Due to limitations of space, these separate tabulations are not included in this published report. Only the totals for all categories are shown.

In 1954 the number of member schools accredited by the Association rose to 3,277, an increase of eighty-nine since the previous year. Twenty-five were "Dependents' Schools" maintained by the Armed Services for the dependents of military and civilian personnel in occupied countries. It will be noted that only the four-year high schools showed a numerical decrease. In 1952-53 there were 1,860 schools of this type and in 1953-54 there were only 1,853, a loss in that category of seven. The six-year high schools gained one; the three-year schools increased by 29; and schools organized on other

bases, for the most part two-year and five-year schools, showed a loss of one. All told, the net gain was 22 schools.

The pupil enrollment increased by 63,294 to a total of 1,674,956. This is the largest number ever reported, surpassing the previous highest enrollment in 1941 by 12,291. When enrollment in the separate grades is examined, we find an increase in each grade from seven through twelve, except in grade nine, where there was a decrease of 386 under the previous year. The average size of a North Central high school continued to climb. The figure was 522, a gain of 17 over 1953.

The number of pupils graduated in 1953 (the report for 1953-54 gives the graduates of previous year) was 325,513, an increase of 13,366. The number of post-graduates increased by 702 over the previous year.

The provision of qualified library personnel to meet the requirements of Regulation 4b, which all schools are expected to meet by 1955-56, has presented a problem in some North Central states. While certain states indicate that there is no shortage of qualified library personnel to meet the needs of North Central Association schools, in others extensive cooperative action by school administrators, the State Committee, and the teacher education institutions will be needed if the dead-line is to be met. The data presented in this report reflect conflicting trends affecting this problem.

It appears that there has been steady, if gradual, progress in the upgrading of library personnel. The number of librarians with no library training fell from 376 to 325, a decrease of 51. Those with from 1-5 semester hours of training decreased from 276 to 259 or a decline of 17, and those with from 6-15 semester hours in library science decreased from 972 to 901, a loss of 17. However, the number of librarians with from 16-23 semester hours of training increased from 495 to 542, a rise of 47, and those who have 24 semester hours or more increased from 1,501 to 1,517, an increase of 16. Thus it seems that we have fewer librarians with little or no training and more librarians with sufficient training. The number of full-time librarians decreased by 51 over the preceding year. We now have 2,059 in a total of 3,744 librarians, who might be said to be sufficiently well trained to qualify. On the other hand we still have 325 individuals acting as librarians with no training at all and another 1,160 with

insufficient training to insure effective service.

Salaries continue to increase. The number receiving less than \$3,200 per year decreased from 14,680 to 1,074. At the same time the number receiving \$6,000 or more increased from 940 to 2,203.

The teacher load, as reflected in the pupil-teacher ratio, remains relatively constant. In 1954 only 22 schools of the 3,210 reporting showed a pupil-teacher ratio of more than 30. Violations of the regulation pertaining to pupil-teacher ratio was found in only seven of the 19 states.

The teacher shortage is reflected in the data on new teachers. The number without a bachelor's degree continues negligible, but increased from 218 to 230. The number short in professional training increased from 184 to 286 and the number with inadequate preparation in teaching field increased from 356 to 469. All told, 712 did not return to the positions which they held the previous year.

The Constitution of the Association¹

ARTICLE I. NAME

The name of this Association shall be the North Central Association of Colleges and Secondary Schools.

ARTICLE II. OBJECT

The object of the Association shall be the development and maintenance of high standards of excellence for universities, colleges, and secondary schools, the continued improvement of the educational program and the effectiveness of instruction on secondary and college levels through a scientific and professional approach to the solution of educational problems, the establishment of cooperative relationships between the secondary schools and colleges and universities within the territory of the Association, and the maintenance of effective working relationships with other educational organizations and accrediting agencies.

ARTICLE III. TERRITORY AND MEMBERSHIP

Section 1. The territory of the Association shall consist of the states of Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, West Virginia, Wisconsin, and Wyoming and/or such areas as may be hereafter included. Territory shall be excluded from or included within the jurisdiction of the Association only upon the recommendation of the Executive Committee and by the vote of the Association. The recommendation of the Executive Committee shall be based on substan-

tial evidence indicating that the action recommended represents the desire of the universities, colleges, and secondary schools of the territory concerned.

Section 2. The membership of the Association shall consist of three classes: (1) universities, colleges, and secondary schools; (2) officers of the Association and members of the Commissions; and (3) honorary members. Only members of Class 1 are eligible to vote at official meetings of the Association.

It shall be understood that membership in the Association for universities, colleges, and secondary schools is purely voluntary. Although all decisions of the Association bearing on the policy and management of universities, colleges, and secondary schools are advisory in character, it shall be understood that the Association has the right to establish requirements for membership, to develop and establish criteria for the evaluation of universities, colleges, and secondary schools, and to establish and maintain all regulations and conditions for continued membership in the Association.

Section 3. Any university, college, or secondary school which has been approved by the Association shall be admitted to membership on the payment of the annual dues. Such membership shall cease if at any time the university, college, or secondary school resigns or is dropped from the approved list of the Association or if the annual dues are more than one year in arrears. Any lapse in membership shall date from July 1 next succeeding the Annual Meeting at which time action was taken to drop the member university, college, or secondary school in question.

Section 4. All individuals holding

¹ As amended at the 1955 Annual Meeting of the Association.

membership on commissions of the Association or serving as elected officers of the Association shall thereby become members of the Association.

Section 5. Honorary members shall be nominated by the Executive Committee and elected by the Association by a two-thirds vote of all members present and voting at any session of the Association held during the Annual Meeting. Such individuals are honorary members of the Association and not honorary members of any particular commission.

Section 6. Honorary members shall receive the NORTH CENTRAL ASSOCIATION QUARTERLY and shall have all the privileges of membership in the Association except voting.

Section 7. Honorary members, officers of the Association, and members of the commissions shall not be required to pay dues as hereinafter defined.

Section 8. Members of the Association, honorary members, individuals officially connected with a university, college, or secondary school which holds membership in the Association, and individuals who are officially connected with the state department of public instruction of a state which is included in the territory of the Association shall have the right to attend the meetings and to participate in the activities of the Association and of the various commissions. It shall be understood, however, that attendance at such meetings and participation therein shall be in accordance with the provisions of this constitution and also with the policies adopted by the various commissions and by the Executive Committee.

ARTICLE IV. OFFICERS, COMMISSIONS, AND COMMITTEES

Section 1. The officers of the Association shall be a president, a vice presi-

dent, a secretary, and a treasurer. The president and vice president shall be elected at the Annual Meeting of the Association for a single term of one year or until their successors are elected. The secretary and the treasurer shall be appointed by the Executive Committee. Their terms of office shall be determined by the Executive Committee.

All officers of the Association and of the commissions shall be officially and actively connected with a university, college, or secondary school which holds membership in the Association or with the state department of education of a state in the territory of the Association as defined in Article III, Section 1.

Section 2. There shall be an Executive Committee, a Commission on Colleges and Universities, a Commission on Secondary Schools, and a Commission on Research and Service, and these shall be constituted as hereinafter defined.

The Executive Committee and the various commissions of the Association shall, within the limitations imposed by the constitution of the Association, have the right to determine their own procedures and to establish rules and regulations for governing such procedures.

Section 3. The Executive Committee. The Executive Committee of the North Central Association of Colleges and Secondary Schools shall consist of the president, the vice president, the president of the Association during the preceding year, the treasurer, the editor of THE QUARTERLY, the chairman and the secretary of each of the commissions provided for in Article IV, Section 2, and four additional members, one of whom shall be elected each year for a term of four years. Qualifications for membership on the Executive Committee shall be the same as prescribed

for officers of the Association in Article IV, Section 1.

The Executive Committee shall receive from the Commission on Colleges and Universities the list of colleges and universities recommended for membership in the Association, shall receive from the Commission on Secondary Schools the list of secondary schools recommended for membership in the Association, and shall submit them to the Association for final approval. It shall publish in the official organ of the Association, the NORTH CENTRAL ASSOCIATION QUARTERLY, the lists of universities, colleges, and secondary schools approved by the Association.

The Executive Committee shall have final authority to hear appeals from the decisions of the commissions, relative to the approval of universities, colleges and secondary schools and to determine the action to be taken upon such appeals.

The Executive Committee shall be under no obligation to a member university, college, or secondary school to consider any appeal from the decision or action taken by a commission unless such appeal is filed with the Executive Committee within thirty days following the Annual Meeting. Before taking final action on an appeal, the Executive Committee shall request the officers of the commission concerned to make a recommendation and to submit therewith all facts pertinent to the case.

The Executive Committee shall submit to the Association for election those persons nominated by the respective commissions for membership therein in accordance with the provisions of the constitution.

The Executive Committee shall determine the time and place of the Annual Meeting of the Association, prepare the programs for the meetings of the Association, approve all programs for the meetings of the various com-

missions, provide for the publication of reports and proceedings, and transact any necessary business. The Executive Committee shall also fill all interim vacancies in the offices of the Association, and upon recommendation of the commissions concerned shall fill interim vacancies in the membership of the various commissions.

It shall be the duty and responsibility of the Executive Committee to coordinate and publicize the work of the various commissions in such ways as to further most effectively the object of the Association.

The Executive Committee shall have the power to authorize and approve all expenditures of funds and to require each commission to submit it to a budget. The proposed budget submitted by each commission to the Executive Committee for approval shall be a complete forecast embracing (1) the program of activities, (2) the estimated receipts together with their sources, and (3) the estimated expenditure necessary to carry out the work of the commission. It shall be the duty and responsibility of the Executive Committee to approve or disapprove in advance of any commitments the proposed program of activities of each commission.

At each Annual Meeting the Executive Committee shall submit to the Association a detailed report of income and expenditures. At the close of the fiscal year the Executive Committee shall require an official audit of all Association Accounts to be made by an auditor selected by the treasurer and approved by the Executive Committee. The audited report shall be published in the NORTH CENTRAL ASSOCIATION QUARTERLY.

All actions taken by the Executive Committee shall be subject to approval or revision by the Association with the exception of actions taken

relative to those matters over which the Executive Committee has been given final authority.

Section 4. The Commission on Colleges and Universities.

The member colleges and universities of the Association shall be grouped according to geographic districts, the number and boundaries of the districts to be determined by the Commission. Also, the member colleges and universities shall be grouped by type of institution, the basis for the grouping to be determined by the Commission.

The Commission on Colleges and Universities shall consist of representatives of member colleges and universities elected by the Commission subject to the approval of the Association, and three representatives designated by the Commission on Secondary Schools from the membership of the Commission on Secondary Schools. Election of members of the Commission shall be in accordance with a formula adopted by the Commission which shall provide for representation by district and by type of institution. Election shall be for a period of four years, one-fourth of the members to be elected annually. Members shall not be eligible for reelection until one year has elapsed, except in the case of a member of the Board of Review who shall continue on the Commission as an added member until the expiration of his term on the Board.

The officers of the Commission on Colleges and Universities shall be a chairman, a vice chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations. The length of term for each officer shall be determined by the Commission.

There shall be a Board of Review whose membership shall consist of the chairman of the Commission, *ex officio* chairman of the Board of Review; vice-chairman of the Commission, *ex officio*

vice-chairman; and seven members of the Commission to be elected by the Commission for overlapping terms of five years each. Upon the expiration of this term no member may succeed himself. If a person who is not a member of the Commission is elected to the Board of Review he shall automatically become a member of the Commission upon election to the Board.

The Commission shall prepare a statement of policy to guide member colleges and universities and also colleges and universities seeking approval by the Association, which statement of policy shall be submitted by the Executive Committee to the Association for approval or rejection; shall receive and consider applications and reports from colleges and universities within the territory seeking approval for membership in the Association; shall make such examinations and surveys of these colleges and universities as it deems necessary; shall make examinations or surveys of member colleges and universities as conditions may require; shall request periodic reports from member colleges and universities; shall prepare a list of colleges and universities recommended by the Commission for accrediting by the Association; shall submit this list to the Executive Committee for submission to the Association for final approval; shall submit to the Executive Committee for final approval by the Association the list of individuals elected to membership on the Commission; shall submit its proposed budget to the Executive Committee for approval; and shall make and publish studies of educational problems approved by the Executive Committee; and, most importantly, shall assist colleges and universities in the territory served by the Association in their efforts to strengthen their programs.

The Commission on Colleges and

Universities may, with the approval of the Executive Committee, grant a college or university the necessary freedom to carry on any educational experiment that the Commission has approved.

During the interval between the Annual Meetings of the Association, the Board of Review shall have the authority to carry on the necessary business of the Commission on Colleges and Universities.

Section 5. The Commission on Secondary Schools.

The Commission on Secondary Schools shall consist of the members of the Committee on Secondary Schools for each of the several states comprising the territory of the Association and eighteen other persons elected by the Commission subject to the approval of the Association for a period of three years, one-third of this number to be elected each year.

The State Committee on Secondary Schools shall consist of:

1. A member of the faculty of the state university whose assignment is in the field of secondary education, to be nominated by the president of the university;
2. the director of secondary education of the state department of public instruction or, in case there is no such officer, a member of the staff of the commissioner of education or superintendent of public instruction, designated by him;
3. and, for states having fewer than 300 high schools accredited by the Association, three administrative heads of secondary schools accredited by the Association; and, for states having 300 or more high schools accredited by the Association, five administrative heads of secondary schools accredited by the Association.

In the event that the president of the state university should refuse or fail to designate a member of the faculty to serve on the State Committee of Secondary Schools, and/or in the event that the superintendent of public instruction or commissioner of education should refuse or fail to designate a member of his staff to serve on the State Committee, the Executive Committee of the Association shall fill such vacancies by nominating for election by the Association persons recommended by the Commission on Secondary Schools.

The administrative heads of secondary schools to be included in the membership of a State Committee shall be selected for membership by majority vote of the administrators of the member schools of the North Central Association within the state. Their names shall be transmitted to the Secretary of the Commission on Secondary Schools by the chairman of the state committee. Upon approval of the Commission on Secondary Schools, the names shall be transmitted to the Executive Committee which shall place the names in nomination for election by the Association. The chairman of each State Committee shall be designated by the Commission on Secondary Schools in accordance with its adopted procedures subject to the approval of the Executive Committee. The term of membership of administrative heads of secondary schools on State Committees shall be three years. No such member shall serve more than two consecutive three-year terms.

No member of the Commission on Secondary Schools may serve for more than six years consecutively, excepting (1) the two members of each State Committee who represent the state university and the state department of public instruction respectively and who automatically shall remain members

of the Commission until their retirement from the State Committee, and (2) members of the Administrative Committee of the Commission on Secondary Schools, who automatically shall remain members of the Commission until their retirement from the Administrative Committee.

The officers of the Commission on Secondary Schools shall be a chairman and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations. The length of term of each officer shall be determined by the Commission.

There shall be an Administrative Committee of the Commission on Secondary Schools composed of the chairman of the Commission, ex officio chairman of the administrative Committee; the secretary, ex officio secretary; the preceding chairman; and four members elected by the Commission at the time of the Annual Meeting of the Association for a period of four years, one member to be elected each year.

The Commission shall prepare for the guidance of member schools and secondary schools seeking the approval of the Association a bulletin setting forth policies, regulations, conditions for accrediting, and criteria for the evaluation of secondary schools. Prior to the publication of this bulletin, it shall be submitted by the Executive Committee to the Association for approval or rejection. The Commission shall receive and consider applications and reports from secondary schools within the territory of the Association seeking approval for membership in the Association; shall make such examinations and evaluations of these schools as it deems necessary; shall make such examinations or evaluations of member schools as conditions may require; shall request periodic reports

from member schools; shall prepare a list of secondary schools recommended by the Commission for accrediting by the Association; shall submit this list to the Executive Committee for submission to the Association for final approval; shall submit to the Executive Committee for final approval by the Association the lists of members elected by the Commission; shall submit its proposed budget to the Executive Committee for approval; and shall make and publish studies of educational problems approved by the Executive Committee.

The Commission on Secondary Schools may, with the approval of the Executive Committee, grant a secondary school the necessary freedom to carry on any educational experiment that the Commission has approved.

During the interval between the Annual Meetings of the Association, the Administrative Committee of the Commission on Secondary Schools shall have the authority to carry on the necessary business of the Commission on Secondary Schools. During this interval, the secretary of the Commission shall have the authority to interpret policies, regulations, and criteria. Any appeal from the interpretations and decisions of the secretary of the commission shall be made to the Executive Committee.

Section 6. The Commission on Research and Service.

The Commission on Research and Service shall consist of twenty-four persons; twelve from member colleges and universities and twelve from member secondary schools. These shall be elected by the Commission subject to the approval of the Association for a period of three years, four members of each group to be elected annually. No member of this Commission shall serve for more than two consecutive three-year terms.

The officers of the Commission on Research and Service shall be a chairman, a vice chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations, but subject to the limitations imposed by the constitution. All officers of the Commission shall be selected from among those who are members of the Commission, and it shall be understood that the term of each officer shall not extend beyond the date of the expiration of his term as a member of the Commission.

There shall be a Steering Committee whose membership shall be determined by the Commission in accordance with its own policies and regulations.

The Commission on Research and Service shall initiate, plan, and carry forward studies in the fields of educational and institutional research and service pertaining to universities, colleges, and secondary schools, subject to the approval of the Executive Committee; shall, subject to the approval of the Executive Committee, engage in such research, study, and activity as either of the other commissions may request; shall engage in such research, study, and activity as the Executive Committee may request; shall report its findings to the appropriate commission or commissions and to the Association, as directed by the Executive Committee; shall submit its proposed budget to the Executive Committee for approval; shall submit to the Executive Committee for final approval by the Association the list of individuals elected to membership by the Commission; and shall furnish leadership in interpreting its research findings and in focusing attention on those problems which are in need of consideration.

During the interval between the Annual Meetings of the Association,

the necessary work and business of the Commission on Research and Service shall be administered by a committee consisting of the officers of the Commission.

Section 7. Nominating Committee.

Prior to each Annual Meeting of the Association, the president shall appoint subject to the approval of the Executive Committee, a committee of five persons whose duty it shall be to nominate properly qualified persons for election to the offices of president and vice president, to membership on the Executive Committee, and to any office not elsewhere provided for by the constitution. The announcement of these nominations shall be made during the first session of the Association held during the Annual Meeting, but election shall take place during a later session. Independent nominations may be made upon the written petition of any ten persons who are members of the Association or official representatives of member institutions. The list of persons so nominated shall be filed with the secretary of the Association not later than twelve hours prior to the opening of the session during which the election of officers is to take place.

Section 8. The Editorial Board.

The Editorial Board shall consist of the president, secretary, and treasurer of the Association, the secretaries of the commissions, and a managing editor selected by the Executive Committee.

ARTICLE V. MEETINGS

There shall be an Annual Meeting of the Association at such time and place as may be determined by the Executive Committee and approved by the Association. Meetings of the various commissions shall be held during the week of the Annual Meeting of the Association. Other meetings of the Association and/or other meetings of any commis-

sion may be held when such meetings are authorized by the Executive Committee and approved by the Association.

ARTICLE VI. FEES

An annual fee shall be paid by each member university, college, and secondary school. The amount of the fee shall be fixed by the Executive Committee, subject to the approval of the Association.

Member universities, colleges, and secondary schools are entitled to have the services of the Association and to receive the NORTH CENTRAL ASSOCIATION QUARTERLY and/or such other publications as may be authorized for distribution.

ARTICLE VII. THE RIGHT TO VOTE

Section 1. Only members of a commission shall have the right to vote at official meetings of the commission of which they are members.

Section 2. All votes at official meetings of the Association shall be by member universities, colleges and secondary schools. Each member univer-

sity, college, and secondary school shall have only one vote on any question before the Association, and this vote shall be cast by an officially designated representative.

ARTICLE VIII. QUORUM

Fifty voting members of the Association shall constitute a quorum for conducting business at any official meeting of the Association.

ARTICLE IX. AMENDMENT

This constitution may be amended by a three-fourths vote of the voting members at any official meeting of the Association, providing that a printed notice of any proposed amendments has been sent to each individual who is a member of the Association and to each member university, college, and secondary school at least two weeks prior to the date of said meeting.

ARTICLE X. PROCEDURE

Parliamentary procedure in all meetings of the Association and of the commissions shall be in accordance with *Robert's Rules of Order*.
